

Job Category: Project Geologist

Employment Type: Term contract (6-7 months), rotational**Location:** Abitibi-Témiscamingue Region / Duparquet, Quebec.

First Mining Gold Corp. (First Mining) is guided by its values of safety, integrity, responsibility and collaboration. We develop and operate our projects safely, reliably and with care for our impact on the environment. With our presence in Québec, Ontario and Newfoundland, our people play an active role in building strong communities.

We are proud of how our hard work and commitment to sustainability sets us apart and benefits society communities where we operate, every day. We are looking for a new team member who shares our values and is ready to take on exciting challenges.

The Opportunity

We are seeking to hire a Project Geologist who will help advance Exploration activities for First Mining, specifically at its Duparquet Projects. Reporting to, and working closely with, the Exploration management team, the Project Geologist will be instrumental in the Exploration Department that provides guidance and geoscience advancement for the company.

Job Description

As Project Geologist, your primary duties and responsibilities will be as follows:

Exploration Geoscience and Targeting Participation

- Provide exploration support in the advancement of corporate gold assets within a diverse portfolio
- Planning, ground truthing and execution of exploration field activities including logging and sampling of oriented diamond drilled core, scouting of drill pads and trails, regional and local-scale field mapping, geophysical ground truthing and geochemical sampling
- Drill hole management including, preparing drillhole layouts, core logging, daily logging report, performing hole shutdown procedures, and evaluating the drill hole performance against the exploration program objectives
- Perform drill site inspections and ensure drill sites are managed and maintained as per First Mining Gold procedure and safety standards and operating procedures
- Support Site Supervisor with daily project reports, and site inductions when required
- Safe field practices in remote areas and working around boats, UTV's, snowmobiles and helicopters
- Historical and current data collection & compilation focused on increasing integrity, standardization, resolution and completeness
- Manage and liaise with supporting industry consultants and advisors

- Contribution in the development of regional and target scale geoscience 3D models supporting exploration
- Provide input within an exploration team setting including review, development and updates in exploration policies and procedures
- Pursue innovation and technologies for the unlocking of modernized techniques in analysis
- Perform other related geological work as required; and such other duties and services that would be reasonably expected to be performed by a person employed by a public mineral exploration and development company in a similar position to that of the employee

Preferred Qualifications and Education

- Self-starter, continuous learner, and a passion for innovation in geoscience related to mineral exploration
- Work safely and contribute to safe practices of the First Mining Gold team
- Willingness to travel and work as per program schedule requirements, and operate in remote work settings
- A university degree in earth sciences with an eligibility for registration with the l'Ordre des géologues du Québec (OGQ) as a GIT/PGeo
- Eligibility to work in Canada
- Minimum 2-5 years of progressive experience
- Posses a valid driver's license
- Prior experience working on District Scale Archean Greenstone hosted gold projects is considered an asset
- Experience and knowledge of the following software is considered an asset: DH Logger, ESRI ArcGIS (Pro) and Leapfrog Geo
- Experience with all terrain vehicles including, ATV, UTV, and snowmobiles considered an asset
- Ability to move and or assist team members in handling core boxes
- Ability to work independently as well as collaboratively in a multi-disciplinary, cross-cultural team
- Oral and written communication skills (French and English) is an asset

About First Mining Gold Corp.

First Mining is a gold developer advancing two of the largest gold projects in Canada, the Springpole Gold Project in northwestern Ontario, where we have commenced a Feasibility Study and permitting activities are on-going with a final Environmental Impact Statement / Environmental Assessment for the project submitted in November 2024, and the Duparquet Gold Project in Quebec, a PEA-stage development project located on the Destor-Porcupine Fault Zone in the prolific Abitibi region. First Mining also owns the Cameron Gold Project in Ontario and a portfolio of gold project interests including the Pickle Crow Gold Project (being advanced in partnership with Firefly Metals Ltd.) and the Hope Brook Gold Project (being advanced in partnership with Big Ridge Gold Corp.). First Mining was established in 2015 by Mr. Keith Neumeyer, founding President and CEO of First Majestic Silver Corp.

Duparquet Project Background.

The Duparquet Project is geologically situated in the southern part of the Abitibi Greenstone Belt and is geographically located approximately 50 km north of the city of Rouyn-Noranda. The Duparquet Project totals ~5,800 hectares focused along an area of 19 kilometres of strike length along the prolific Destor-Porcupine Fault Zone, along with numerous mineralized splays and influential secondary lineaments. The Duparquet Project includes the past-producing Beattie, Donchester and Duquesne mines and as well as the Central Duparquet, Dumico and Pitt Gold deposits. In 2023, First Mining completed a positive Preliminary Economic Assessment (PEA) for the project that will guide phased optimization and advancement moving forward.
